# General Website Maintenance

Many of our clients express that they are simply too busy running their own business to be tied handling web updates on their premises. We can offer a tailored maintenance contract to suit your requirements and budget.

Maintenance Prices start from only **£45 per month** + VAT

## Content Management Systems

### HTML/FTP

We understand that some customers do not wish to be tied to us for maintenance and would like the facility to manage updates from within their own organisation.

For html based websites we can supply all the necessary files and grant FTP access, this however requires some html knowledge and software on the clients side.

### CMS:

We also offer several solutions for those clients with no html knowledge that still empowers the client to manage their own content and updates.

A popular option is Contribute software from Adobe, this software enables staff with basic computer skills to manage updating various elements of their website. Full training and installation is included.

Content Management Systems from only **£250** + VAT
